
Analyslide® Petri Dish

Description

Like a Petri dish on a slide

- Rectangular base fits most microscope stages.
- Inner cover ring for air-tight securing of sample does not interfere with viewing.
- Frosted area on base permits identification of the sample with pencil or marker.
- Convenient "slide pack" box simplifies collecting samples in the field.

Applications

- Protect the integrity of sample membrane during microscopic examination.
- Store and protect membrane filters for reference.
- Doubles as an examination and storage container for 47 mm filters.
- Fits most microscope stages.

Specifications

Material of Construction
